Space Emergency Sale Used Pianos

Doing the largest piano business in America during rebuilding operations that have caused us to vacate the warerooms in buildings south of Ninth street, has brought us face to face with conditions that demand quick action and large sacrifice.

Every square foot of space is demanded by the new pianos which our fall business is bringing to our floors daily. At the same time we have to take scores of pianos in exchange for our Chickering, Mason & Hamlin, Vose, and

the other pianos; and we have to receive the pianos that have been out on rent. These must go out quickly again, to give all space to the new pianos. No matter how little used they are. And

many of the rented pianos haven't a discoverable mark on them to tell they have ever been used. Added to these are quite a number of new pianos, which show checks in the veneer, and a few that have stayed on

our floor too long because the styles of the cases were not popular. Everything that is not absolutely perfect or in the

most modern and popular styles of cases must make way for the superb stock provided for our regular Fall business. Included are Chickering, Mason & Hamlin, Vose, Crown,

Kurtzmann, J. C. Campbell, Frederick Doll, and many other less notable but worthy makes. As well as a large group of Mason & Hamlin Organs that offer extraordinary opportunity to organ buyers. We have probably never made an offering where the

standard of the instruments was so high and the priceconcessions so much more radical than the condition of the instruments would ordinarily demand.

It is the great occasion of the fall season to secure a superb piano under-price.
